

BANNUSHA SHAIK

Software Engineer | Backend (Python/FastAPI) · DevOps/Platform · AI/ML & GenAI

Bangalore, India | +91 8074671779 | bannushaika85@gmail.com | [linkedin.com/in/bannushaika400](https://www.linkedin.com/in/bannushaika400) | github.com/bannushaxddd

PROFESSIONAL SUMMARY

Software Engineer (B.Tech AIML) with a Fortune 500 internship at SKF delivering production enterprise applications on Microsoft Power Platform (Power Apps, SharePoint, Office 365), plus hands-on backend, DevOps/observability, and GenAI engineering proven in deployed projects — Python/FastAPI, Docker, CI/CD, Prometheus/Grafana, LLM APIs. Builds systems end-to-end — API design, data modeling, caching, real-time features (WebSockets/SSE), deployment, and monitoring; project systems sustain 1,000+ QPS with sub-10ms p95 latency. Seeking Backend, Full-Stack, Platform, or GenAI Engineer roles.

TECHNICAL SKILLS

Backend & Languages: Python · FastAPI · Node.js · JavaScript · REST APIs · Async Programming · WebSockets · SSE · Microservices · System Design
Databases & Caching: PostgreSQL · SQL · Redis · MySQL · MongoDB · Schema Design · Query Optimization · Indexing · Caching · BM25
DevOps & Cloud: Docker · Docker Compose · CI/CD · GitHub Actions · Linux · Nginx · Git · Render · Deployment Automation
Observability: Prometheus · Grafana · Alertmanager · Loki · Metrics · Logging · Dashboards · Alerting · SLI/SLO · Runbooks
AI/ML & GenAI: LLMs · Google Gemini API · Prompt Engineering · Generative AI · Machine Learning · Deep Learning · NLP · Transformers · Information Retrieval · EDA · Pandas · NumPy · scikit-learn · Power BI
Enterprise Platforms: Power Apps · SharePoint · Office 365
Fundamentals & Tools: DSA · OS · DBMS · Computer Networks · OOP · Statistics · Linear Algebra · Agile · SDLC · Postman · Unit Testing

PROFESSIONAL EXPERIENCE

Software and Digital Developer Intern — SKF (Fortune 500 Industrial Technology) | Jan 2025 – Present | Bangalore

- Delivered a production 5S Audit Management app on Microsoft Power Platform (Power Apps canvas, SharePoint, Office 365) replacing paper-based factory compliance workflows — digital audits, photo evidence capture, scoring, and action tracking across manufacturing teams.
- Designed an 11-screen canvas app covering all five 5S pillars, with per-pillar question banks of factory-floor audit criteria, department/zone selection, and weighted qualification-scoring logic (qualifying thresholds, rounded score calculation).
- Modeled SharePoint-backed data — audit drafts and zone lists on the SKF O365 tenant — with write-back via Patch, and identity-aware, department/zone-scoped audit flows driven by the signed-in user context.
- Built score-card and compliance trend views surfacing bottlenecks for factory leadership; partnered with shop-floor stakeholders on requirements, usability, and deployment readiness in a live industrial environment.

GenAI Data Analytics Job Simulation — Tata Group (Forage) | 2024

- Modeled delinquency risk on structured financial datasets with GenAI-assisted analytics; produced executive-ready business recommendations.

PROJECTS

NEXORA — Production Search Engine | Python · FastAPI · Redis · BM25 | github.com/bannushaxddd/NEXORA · nexora-1kj.onrender.com

- Search service at 1,000+ QPS with sub-10ms p95 latency — custom Okapi BM25 over a hand-built inverted index; Redis caching (~85% hit rate); async REST APIs for search, corpus management, live analytics.
- Benchmarked at 1,000+ QPS with ~2ms cached / ~5ms uncached latency; pytest & pytest-asyncio test suite documented in repo.

SYNCOUT — Real-Time Collaborative Code Editor | Python · FastAPI · WebSockets · Docker · CI/CD |

github.com/bannushaxddd/SYNCOUT · syncout-x.onrender.com

- Operational-Transform collaboration for 100+ concurrent sessions with sub-50ms sync — live cursors, conflict resolution; Dockerized with GitHub Actions CI/CD.

Observability Platform | Prometheus · Grafana · Alertmanager · Loki

- End-to-end monitoring: Prometheus scraping, Grafana dashboards, Alertmanager routing, Loki log correlation, exporters (node/Nginx/MySQL/Mongo); SLI-style signals with alerting rules and runbooks.

GETYOQUERY — AI SQL Generator (deployed) | Node.js · Express · React · Gemini API · SSE |

github.com/bannushaxddd/GETYOQUERY · getyoquery.onrender.com

- Natural-language-to-SQL across 8 SQL dialects with JWT auth (bcrypt), PostgreSQL-backed query history, structured JSON generation via Google Gemini streaming (SSE), and hallucination-reduction prompts.

EDUCATION

B.Tech — Artificial Intelligence & Machine Learning | PES College of Engineering, Bangalore | Expected May 2027

Coursework: DSA, Operating Systems, DBMS, Computer Networks, OOP, Generative AI, Machine Learning, Deep Learning, NLP, Statistics & Probability, Linear Algebra, Cloud Computing
